Re: Support for SB32

Honorable Senator Pavley

We are proud to be able to support your legislative actions to curb climate change. We are grateful for your work and leadership on this issue, as it seems to us and many others that it is perhaps the most pressing issue of our time and the root cause of many other problems such as our current drought, increasing wildfires and loss of diversity.

Thank you so much for you efforts in this area.

Our members also have a long history of supporting your work on climate change for nearly a decade. We supported and worked towards the passage of your 2006 SB32 and walked our neighborhoods, stood in front of grocery stores, etc to urge no votes on 23, the oil companies' attempt to overthrow it.

So we hope you will consider our request when we add one more item to this support letter. Our Board members asked that when writing this letter of support, I also mention that carbon trading may not, in the end, be the most comprehensive tool to address climate change. We urge you to also consider an extraction fee and/or a fee on carbon.

Thank you again for all your hard work on this issue.

Sincerely,
