

ECO-FILM FESTIVAL

at College of the Canyons 

The **SCV Eco Alliance** is holding its third annual Eco-Film Festival at College of the Canyons in Santa Clarita this Spring! Seven films will be shown in four time blocks, and a short discussion/Q&A will follow each film.

Information about organizations in the SCV Eco Alliance (listed below), opportunities to engage, fun activities, an art installation and free giveaways will be on display at tables in the Aliso Courtyard.

The event is free of charge and complimentary parking is available in any campus parking lot (lot 13 is closest).

The Tacos Jimenez food truck will be on site, with vegetarian and other options available for purchase. Please consider bringing your own reusable container and utensils to prevent waste.

Saturday, March 7, 2026

10:00 am - 4:00 pm

COC Valencia Campus

26455 Rockwell Canyon Rd.
Aliso Hall

Film List

- The Biggest Little Farm

ECO-FILM FESTIVAL

at College of the Canyons

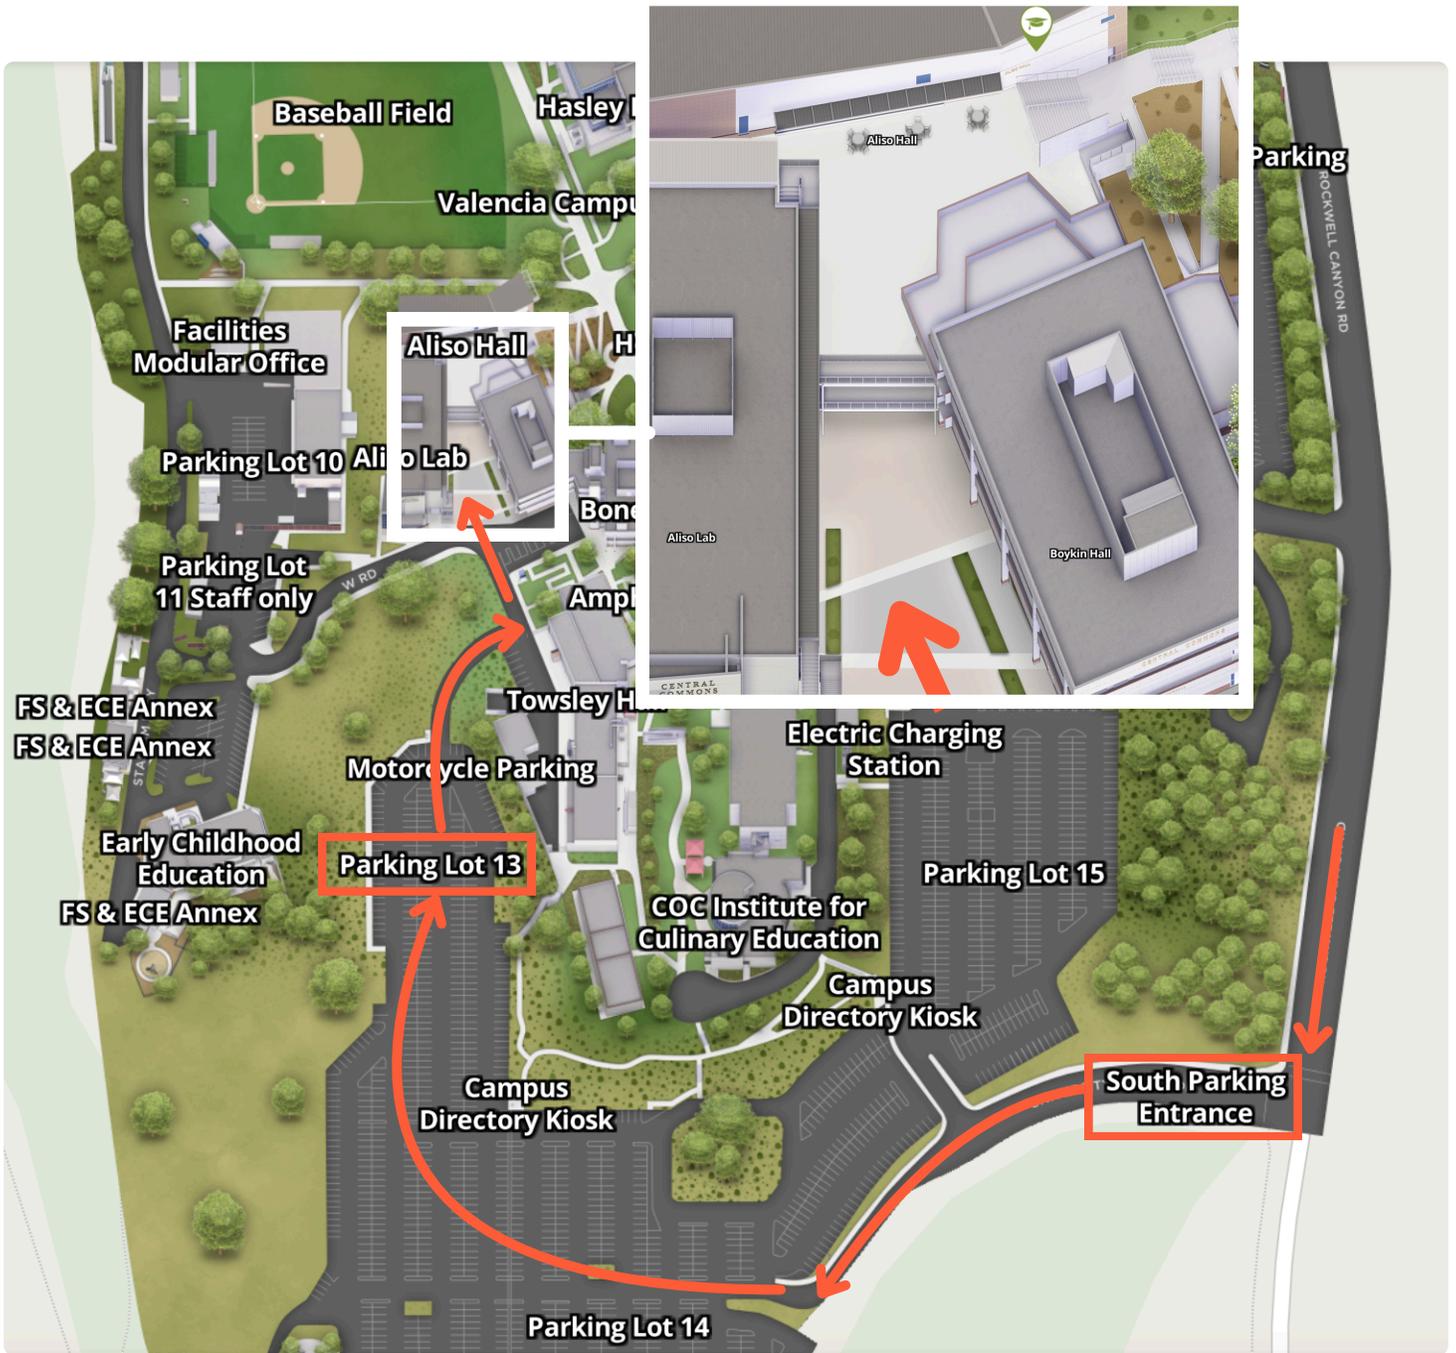

TIME	FILM/LOCATION	SUMMARY
10:00 am - 12:00 pm	Ocean (2025, 90 min.) (ALLH 101)	Sir David Attenborough takes viewers on a breathtaking journey showing there is nowhere more vital for our survival, more full of life, wonder, or surprise, than the ocean. Through spectacular sequences of coral reefs, kelp forests and the open ocean, he shares why a healthy ocean keeps the entire planet stable and flourishing.
	Chasing Chimeras (2025, 50 min.) (ALLH 104)	Chasing Chimeras exposes how the fossil fuel industry is pushing false climate solutions, like renewable diesel, hydrogen, biogas, and carbon capture. It dives into the real-world impacts of the climate deceptions threatening frontline communities and delaying real climate action.
12:00 pm - 12:45 pm	The Story of Stuff (2007, 22 min.) (ALLH 101)	The Story of Stuff looks at the underside of our production and consumption patterns and calls us together to create a more sustainable and just world.
	Hydrogen Hype (2025, 8 min.) (ALLH 101)	The fossil fuel industry presents hydrogen as a silver bullet solution to the climate crisis. But with its large water and energy footprint, is it really worth the hype?
12:00 pm - 1:30 pm	Lunch Break	Tacos Jimenez (*truck on site 11am - 3pm)
12:45 pm - 1:30 pm	Roots of Renewal (2024, 33 min.) (ALLH 104)	Farmers in Central America, guided by the principles of agroecology, are feeding their communities and playing a critical role in healing the planet. Expert voices explain how these regenerative practices can play a key role in reversing environmental degradation and ensuring a sustainable future.
1:30 pm - 3:30 pm	The Biggest Little Farm (2019, 91 min.) (ALLH 101)	The story of how Apricot Lane Farms, in Moorpark, CA, came to be. A couple's dream to transform 10 acres of land that had been farmed extractively for 50 years turned into a joint 214-acre regenerative endeavor that created a reawakened ecosystem. Witness their adventures, trials, and tribulations in this inspiring film.
	The White House Effect (2024, 96 min.) (ALLH 104)	Archival material tells the dramatic origin story of the climate crisis and how a political battle in the George H.W. Bush administration changed the course of history. Bush's promise to use "the White House effect" to tackle global warming proves hollow when clashes occur between industry power brokers and EPA chief Bill Reilly, representing environmentalists.

ALLH - Aliso Hall
